

UFB IS HERE.

**WHY YOU
SHOULD CHOOSE
EduNet
WITH
FIBREPLUS.**

Ultra Fast Broadband or UFB opens up the world of high speed internet and will allow you all sorts of exciting online teaching and learning opportunities.

But to access Ultra Fast Broadband, You will need to appoint a Retail Service Provider (RSP).

It is important that you choose your RSP very carefully, as this decision involves highly technical and complex issues.

So here's a quick snapshot of the key areas you should consider which shows how **Fibreplus** ticks all these boxes.

01: GO FOR EXPERIENCE

The online needs of a school are quite unique and to get the most out of the UFB opportunity, it's important to choose a Retail Service Provider with proven experience in this area.

Fibreplus is a Retail Service Provider who offer UFB services to schools through our EduNet services with qualified staff. EduNet offers schools uncapped ultra fast internet access, collaboration between each other at the maximum speed of their connection, and a peering network which allows them to access rich content at unrestricted speeds.

02: STAY IN CONTROL

- **You decide on your solution** – with EduNet the needs of your school dictate the solution – it's customised, not a one size fits all solution.
- **Costs are under control** – EduNet has no data caps and offers flat rate charging so there are no nasty surprises on your bill at the end of the month.
- **You choose your bandwidth and access speed** – but if your online needs increase, EduNet allows you to change this any time you want.
- **No long-term contract** – EduNet will not lock you in, our minimum contract period is one year only.

03: DEMAND RELIABILITY

- **EduNet has been specifically designed for use in an educational market.**
- **Vector is the only network operator in NZ certified** by Metro Ethernet Forum certification, a globally recognised standard for fibre network technical performance and quality.
- **Fibreplus** has been providing instant support to our customers with the right knowledge.
- **EduNet has been developed** by Vector Communications, which is part of Vector, one of the largest owners and managers of multi-network infrastructure in New Zealand.

04: INSIST ON SHARING

- **Collaboration** - EduNet enables schools to communicate online with each other and share resources such as teachers, without being limited by the speed of their internet connection.
- **A peering network** which enables schools to directly access rich content and educational services from our network at unrestricted speed.
- **Viewing quality and speed** is improved with a peering network, while overall bandwidth cost is reduced. Cloud solutions and other cost saving initiatives can also be implemented through a peering network.

05: CHOOSE AN EXPERT

- **Vector recommends Fibreplus** as one of the official EduNet Partners. We have experience in school environments and in successfully implementing EduNet.
- As a proud EduNet Partner, Fibreplus offers **full support and have key people accountable** to your school.
- **Fibreplus** is a reliable company with experienced local staff has been working in the ICT industry for more than 14 years. With Fibreplus - NO additional cost, NO additional problems & NO data caps

06: ASK FOR PROOF

“If we are asking teachers to undertake extensive PD to implement ‘Bring Your Own Device’, and asking parents to spend \$800 on a device we had better deliver and Vector Communications has – with Ultra Fast Broadband into the school.”

- Mark Quigley, Deputy Principal Orewa College

“Our students learn best through collaboration and creativity. EduNET provides the best platform for students to learn, create and share using high quality online resources.”

- Daniel Wilson, Deputy Principal, Manurewa High School
